Website : https://www.kidney.org/phi/form?version=health

Advantages :
- It is a simple way for diagnosing kidney health.
- It is cheap and efficient.
- No complex procedures are required for the analysis of the patient's kidney.

Disadvantages :
- It does not provide accurate results as the data provided by the patient is insufficient.
- It does not take into account other factors such as the patient's lifestyle, medications taken. etc.
- It might provide incorrect results which could instill fear in those who have healthy kidney.

Advantages :
- It is more informative and provides knowledge to the people about various illnesses.
- It contains data and surveys from people all around the globe.

Disadvantages:
- New patients are not able to sign up.
- The user interface might be too complex for the elderly.
- The process for signing up new patients might be expensive.

Website : https://www.kidney.org/atoz/content/about-chronic-kidney-disease

Advantages:
- It provides information about chronic kidney disease and tips to prevent them.
- The user interface is colourful and easy on the eyes.
- It is an easy and efficient way for registered patients.

Disadvantages:
- There is no option for new patients to sign up.
- The process for registration might be tedious and complicated.
- Some of the content is in Spanish so patients from other parts of the world might find it difficult to understand.
